

**WARNING! WARNING! WARNING! WARNING! WARNING! WARNING! WARNING! WARNING!**

**Warning, Installing a different firing pin, Other than the FACTORY replacement, OR the Harrington Products CZ-52-0, CZ52-0m, CZ-52-1, or CZ-50/70-1 will DISABLE FIRING PIN SAFETY.**

Warning! The Harrington CZ52-2 and CZ52-3 firing pin kits effectively disable the firing pin block safety. Instead we use a spring return to retract the firing pin. If the decocker on you CZ-52 is defective (and many are...do the pencil test - put a pencil into the barrel and activate the decocker - if the pencil moves at all, the decocker is basically a trigger!), installing these firing pin kits may increase the chance of a negligent discharge (this is no such thing as an 'accidental' discharge). If you do not feel comfortable with this idea, please do not install this kit in your pistol.

**BE CAREFULL PLEASE!!!**

**NEW FIRING PINS  
(CZ-52-0 CZ-50/70-0)  
CZ-52 AND CZ-50/70**

**LIMITED WARRANTY**

**HARRINGTON PRODUCTS  
7726 SR 26 E  
LAFAYETTE, IN 47905  
(765)-589-9112**

**Any warranty to firing pin, must be returned to factory-direct to evaluate the warranty.**

The Czech CZ-52 is an inherently accurate and well-made pistol. The CZ-52 also fires a powerful cartridge, pushing an 85 grain pill between 1450-1900 fps, and is effective at distances exceeding 100 yards. Both the guns and surplus ammo are relatively inexpensive.

All Harrington Products firing pins are machined from high impact tool steel, hardened to around 42 Rockwell. We are so confident in the quality of this product that we expect it to outperform and outlast the factory produced pin in almost any situation (in testing, we have dry-fired this pin over 100 times without breakage). The CZ-52-0 Factory Military style Pin is not made for continues Dry-Firing it is made for when it is accidentally dry-fired.

**Product #CZ52-0 Factory Military style firing pin - Price \$ *Limited factory warranty***

Limited warranty only covers manufacturing defects. In any other breakage, must be evaluated only by Harrington Products, due to nature of the design of the factory CZ-52 and CZ-50/70 firing pin.

**Product #CZ52-1 Military style firing pin - Price \$45 *Full factory warranty***

Modified military style firing pin and firing pin return spring. Installs in the same manner as the factory firing pin. Preserves original military trigger pull weight, but eliminates firing pin tip breakage.

**Product #CZ52-2 Competition firing pin and trigger enhancement - Price \$45 *Full factory warranty***

Harrington Products firing pin, firing pin return spring, firing pin detent, and firing pin detent spring. Drastically reduces trigger pull weight and eliminates firing pin tip breakage. Installs in a stock CZ-52 slide in seconds. No modification to factory trigger parts. Some pistols will require modifying the factory extractor or replacing it with the Harrington Products extractor. This product will be the best for most users firing factory ammunition.

**Product #CZ52-3 Heavy Competition firing pin and trigger enhancement - Price \$45 *Full factory warranty***

Harrington Products firing pin, firing pin return spring, firing pin detent, and firing pin detent spring. Drastically reduces trigger pull weight and eliminates firing pin tip breakage. Installs in the same manner as #CZ52-2, but has a much heavier firing pin return spring. Again, no modification to factory trigger parts

Some pistols with extremely heavy recoil springs over 16.5 lbs., and firing strong hand loaded cartridges, may benefit from a heavy firing pin recoil spring. Installing #CZ52-3 will require modifying the factory extractor or replacing it with #CZ52-4. The factory extractor may be modified with a small circular file.

**Product #CZ52-4 Heavy Competition extractor- Price \$45 *Full factory warranty***

A modified extractor for the CZ52 pistol, designed to work with our heavy competition firing pin and trigger enhancement (#CZ52-3). Spare extractors for CZ-52 pistols are also getting scarce, and this product can also be used as a replacement or spare extractor on stock factory pistols. Machined from high grade tool steel and hardened to around 36 Rockwell. The Harrington Products extractor may also benefit some pistols using our standard firing pin.
